

Your latest update from The Office of the Data Protection Authority (ODPA).

## An update from our Commissioner

Reflecting on the month of May, we continue to see the pace of digital innovation challenge how personal data is used and protected.

In this month's feature, [When AI gets it wrong](#), we highlight a real-world risk of over-reliance on AI and the importance of human judgement in safeguarding accuracy and trust.

This month, we have been pleased to deliver sessions to both parents and school children, supporting greater awareness of online safety and responsible data use.

Looking ahead, we are particularly encouraged by opportunities to extend this work to older and more vulnerable members of our community.

**Brent R Homan**

Data Protection Commissioner

Bailiwick of Guernsey
